</> JavaScript  
{ } CSS

## Programs, Frameworks, & Tools

Git / GitHub  
Atom / Spring Tool Suite  
Lightroom  
JUnit  
Amazon Web Svc  
MySQL  
AngularJS

The common thread in my career has been delving into new and unfamiliar fields and learning quickly to bring value to the team and customer. My travels all over the world has introduced me to many walks of life, and that has helped me to learn how to adapt to best facilitate communication and teamwork.

I have a passion for assisting organizations and businesses making significant impacts on the way people do things. I enjoy traveling to unfamiliar places and learning languages.

As a coder, I'm just starting out. I've grown from terminal run Java programs to fully functioning web-apps and collaborating with fellow programmers on projects in less than 6 months. I look forward to chatting and looking for ways to bring value to the organization and its customers.
